CHANGE YOUR VIEW, **CHANGE YOUR THINKING**
A REAL ALTERNATIVE FOR **PORTABLE DISPLAYS**

Very Displays - Always lean, efficient & effective

With an increasing need within the B2B sector for a reliable, credible, dynamic sole supplier of advanced large format print products, retail solutions and portable displays solutions, we've evolved to meet this requirement and become a trusted partner, supporting your business.

1. NEED A POSITIVE PARTNERSHIP?

Experience and efficiency are key requirements for today's B2B businesses that want simple, speedy solutions. We are flexible, supportive, transparent, fast and easy to work with ensuring your experience is always positive, productive and straightforward.

3. NEED RELIABLE QUALITY AND SERVICE?

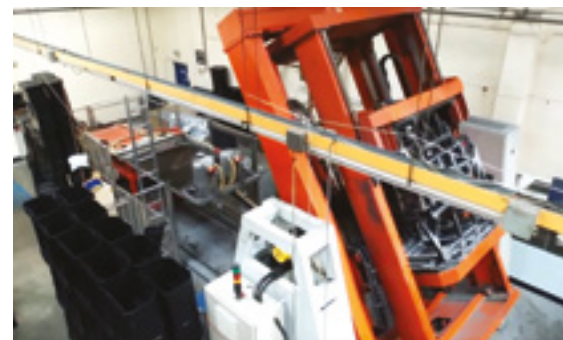

- Custom designed live manufacturing and warehousing software
- Barcoding system
- Right products in the right quantity
- We collaborate with experienced couriers who aim to deliver on time in 98.8% of shipments
- Quick responses within 1-2 hours

We've selected the best-selling products within our range to offer efficient solutions to help maximise your time and profit.

2. NEED AN INSPIRATIONAL STAND OUT SOLUTION?

At Very Displays, we are passionate about **designing** and **engineering** our own pioneering products, many of which include innovative, high-performing patented parts that are engineered to remain robust in the most challenging conditions. Our creativity gives you the freedom to **discover new and exciting solutions!**

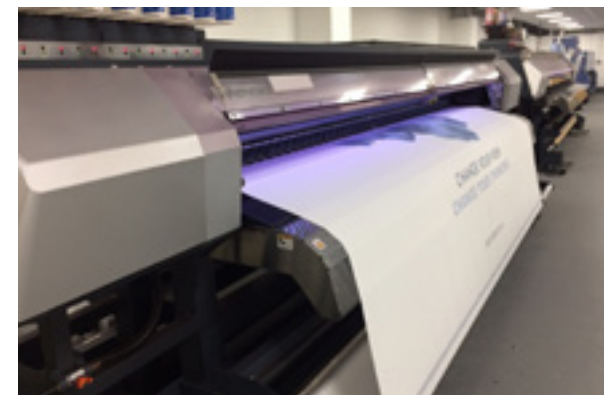

4. WANT WIDE AVAILABILITY AND OPTIONS?

Our extensive product range means we are confident we can supply whatever you need or manufacture in house. Our conveniently centralised **UK location** is perfectly placed for rapid transit times and next day deliveries. Our strategically positioned warehouses **across Europe** mean we can export effortlessly – **fast**. With multiple stock locations **in the UK and Europe, we can retain surplus stock and ship immediately. Single Integrated System** - ensures our distribution hubs work from the same stock system seamlessly.

1-5 YEAR LIFETIME GUARANTEE

6. ONLINE OR WEB-BASED BUSINESS?

We specialise in automated processes for ordering, tracking, delivering to end clients, re-ordering online, checking account status and invoicing. The Very Displays customer portal enables you to review order status, easily place repeat orders and review data, making it simple to manage your budget, reduce admin time for your buyers, while providing instant updates to your customers.

5. NEED SUPPORT?

Our **technical support** is first class. We can provide **product training** in person and our comprehensive **user guides** provide informative details of how to set up products. Our FAQ and **online chat** service provides instant answers. We personally demonstrate new products and our **Marketing support** is available online to provide hi-res images, brochures, price lists, leaflets and promotions. **After sales support** is important to us, we are here to help and deliver a positive experience, whatever your requirements.

7. COMPETITIVE PRICES - EVERY TIME.

Very Displays is one of the most **competitive** suppliers in the UK and Europe. Our products are designed to be stylish, high performing and competitive at the same time.

8. NEED FINANCE?

We appreciate the need to manage budgets and **cash flow** plus possibly allowing goods to be shipped on payment terms. Based on positive financial feedback, we can offer bespoke Payment Terms to loyal customers.

9. NEED PEACE OF MIND AND WARRANTY ASSURANCE?

We have so much confidence in the quality of our products, we provide a **5 year guarantee** on our economy and medium range, as well as a **lifetime guarantee** on our luxury range (*T&C apply). Our outdoor and lighting range have a one year guarantee.

THE FUTURE:

We have a vision for the future that has driven us from the very start. It focuses on delivering excellence every time, uncompromising value and sophisticated, stylish solutions offer to outstanding functionality in an increasingly demanding market. Strive to achieve these levels of excellence and the unexpected happens: limits are pushed, expectations exceeded. At Very Displays, our passion is focused on designing and engineering our own solutions which provide high

quality, high performing displays to the industry. We lead the way as we evolve.

The future awaits, with new solutions, new challenges and no limits.

MAGNETIC POP UP
FABRIC POP UP
TUBE SYSTEMS

Backwalls

Standard Magnetic Pop UP, Fabric Pop UP or Tube Systems for textile graphics provide fast solutions to display your large format message. Each system can be set up in minutes using a wide range of graphic materials, you decide the best option for you.

Magnetic Pop Up

Magnetic Pop Ups are available in straight or curved shapes and in a variety of sizes including Counters and Towers. There is a range of useful accessories that complements your pop up display. From stabilising feet to lighting and shelving to carry cases.

Magnetic Pop Ups are stable, flexible and long-lasting. Using

plastic rollable panels that magnetise to magnetic bars a seamless large image is created. That can simply be rolled away when not in use and stored in a wheeled carry case ready for the next time.

Changing of the image is very simple and can be applied to the same hardware repeatedly so the ROI stacks up.

There are a variety of options

MAGNETIC POP UP STRAIGHT

- Stable and compact footprint
- Use stabilising feet for greater stability
- Easy to print for same size panels Front and Back
- For perfect straightness add rigid profile to the panels
- Adjustable feet on both sides

MAGNETIC POP UP CURVED

- Wider footprint creates even more stability!
- Curved system does not require stabilising feet
- Engaging look like a modern curved TV screen
- A look and feel beyond its cost
- Adjustable feet on both sides

Type of Pop-up	Overall Size	Print Size	Weight
Pop Up Straight 3x2	H 224 x W 197 x D 30.6cm	H 222.5 x W 146.6cm	7.7-19kg
Pop Up Straight 3x3	H 224 x W 277 x D 30.6cm	H 222.5 x W 219.9cm	9.6-21kg
Pop Up Straight 3x4	H 224 x W 343.5 x D 30.6cm	H 222.5 x W 293.2cm	12.1-24kg
Pop Up Curved 3x2	H 224 x W 193 x D 48cm	H 222.5 x W 134.6cm	7.5-18.9kg
Pop Up Curved 3x3	H 224 x W 254 x D 69cm	H 222.5 x W 201.3cm	9.1-21.5kg
Pop Up Curved 3x4	H 224 x W 307 x D 96cm	H 222.5 x W 269.2cm	11.1-25kg
Pop Up Curved 3x5	H 224 x W 343 x D 122.5cm	H 222.5 x W 336.5cm	14-26.7kg

MAGNETIC POP UP COUNTER

"We thought of everything! Compact, stylish and easy to carry"

The magnetic pop up counter is stronger than you imagine, wraps itself around you and projects a great image to clients.

Fabric Pop Up

Fabric Pop Ups are available in straight or curved shapes and in a variety of sizes including Counters. There is a range of useful accessories that complements your Fabric pop up display from stabilising feet to lighting, bags and cases.

The advantage of the fabric Pop Up is that the graphic can remain on the frame all the time and this pop up has no assembly parts to lose. This makes the display very fast to use whilst also being lightweight and stable.

FABRIC POP UP STRAIGHT

- The stand is exceptionally stable and takes up less space than a curved wall. Stabilising feet available
- The textile graphic is washable and, if specified, wraps around the sides of the system
- The system uses a frame and a textile graphic making it highly portable
- With the slight stretch to the graphic the image is tensioned and seamless
- Complete with carry bag

FABRIC POP UP COUNTER

"The fabric pop up counter is the premium counter choice for your brand. An effortless way to display your message with an assembly time of less than 3 minutes!"

With the option for the graphic to stay on the frame while not in use, this makes the Fabric Pop Up Counter the perfect choice for the regular exhibitor. One seamless fabric graphic creates a continuous message, a fantastic way to showcase your product. An internal storage shelf allows you to store up to 5kg within the counter allowing you to maximise your counter top space. Comes complete with protective carry bag to ensure that both your products and investment are well protected.

Tube Systems

Tube Systems are made from strong yet lightweight aluminium which are then covered with high performance stretch fabrics. The fabrics completely cover the aluminium tubes meaning the whole display looks sophisticated, luxurious and has an edge like no other display system.

Printing technology has allowed fabrics to evolve so that they can follow the shape of the tubes whether it is straight, curved or twisted.

Tube systems are available in a variety of sizes, shapes and styles and have become one of the fastest growing trends. Finally they represent excellent value for money and the tube systems can be used over and over again. You can simply change your graphics as your message evolves.

STRAIGHT WALL TUBE SYSTEM

"A simple yet elegant straight wall of fabric display zipped tight to look great"

There is nothing better looking and faster than the straight wall tube system.

- High impact
- Sharp image with a soft touch
- Very durable and can be washed
- The most portable display of its kind

HOW DOES IT WORK?

1. Every tube system uses strong yet lightweight tubes that connect together like a traditional tent. Some of the tubes have bungee cords and all of the tubes are marked with numbers for easy assembly.
2. The stretch fabrics simply stretch over the assembled tube shape and form a great looking, crisp display.
3. The graphics are washable if you get them dirty and fit like a pillow case, simply zip on and zip off.
4. The graphic and tubes can be quickly dismantled and stored away in a very compact padded carry bag.

HOW TO TAKE CARE OF YOUR FLAGS AND OUTDOOR BANNERS

1. Over the weeks and months your flag may discolour from air pollution, the bright whites will become more grey and bright colours may dull a little. UV rays will cause deterioration and fading to the fabric and thread.
2. Textile flags and banners can be washed normally at up to 40 degrees wash with normal household detergents. This will remove the dirt and make them look brighter again. Dry your flag completely before storing to prevent mould.
3. In heavy rain and heavy winds over the stated wind speed you should take down your outdoor product and store away safely.
4. Your flag will last longer if cared for, any edges that

become frayed should be trimmed, re-inforced and re-hemmed. Life expectancy of a flag in normal conditions is 4-6 months.

5. To keep your flag or banner in good condition make sure they are not rubbing on anything sharp which will wear them quickly and make sure you position them with enough space to rotate freely.
6. RECOMMENDATION -Outdoor banners in continuous use printed on PVC/Vinyl will benefit from wind slits which will de-power the force of the wind and put less stress on the banner and the product they are attached to.

TELESCOPIC FLAG POLES

"High performance water base flags"

These aluminium telescopic poles can literally be used anywhere.

- **2 versions in 4m and 5m high**

PROTECT YOUR INVESTMENT
BEST RANGE OF CASES & BAGS
STANDARD & CUSTOM OPTIONS

Cases & Bags

The last part of your display
and crucial in keeping it in good
condition wherever you are
travelling, choose from sturdy
display
cases to user friendly protective
bags.

Transport Cases

We aim to ensure that every piece of valuable equipment or kit arrives at its destination in perfect condition. Our sister company Trifibre have invested in the latest technologies such as CAD (Computer Aided Design), CNC routing and rotational moulding processes to produce the highest quality cases consistently, at the most competitive prices.

Cases are the unsung heroes that protect your investment between outings. Trifibre is the market leader in supplying exhibition cases to the displays industry and can provide a wide range of products to help ease the logistics of exhibiting.

ZEUS POP UP CASE

The Zeus is the standard default moulded wheeled pop-up case that protects, transports and turns into an innovative graphic counter with choice of table top. The pioneering design of the Zeus case allows a partition clip onto the case to protect the graphics.

The case is designed to comfortably accommodate a graphics roll of 330 diameter & a frame up to 330 x 220 mm. The internal case height is 940 mm (case: 860, lid: 80mm).

Code	Overall Size	Internal Dimensions	Print Size	Weight
CASE-ZEUS	H 97 x W 61 x D 39.5cm	H 94 x W 54 x D 32cm	H 78.5 x W 177.5cm	8.8kg

EOS CASE

The EOS is the big brother to the Leonardo being larger and taller allowing for more storage of larger items whilst keeping everything protected even if you send by courier.

New investment in the latest rotational moulding technology has allowed Trifibre to manufacture a wide range of exhibition cases. Allowing stylish looks at a competitive price. The case can be supplied with a folding counter top or a standard table top. These fit neatly into the case for transportation. Combine two single Eos Cases with a double table top.

Code	Outer Dimensions	Internal Dimensions
CASE-EOS	H 112 x W 52.5 x D 44cm	H 110 x W 46 x D 39.5cm

LEONARDO CASE

The Leonardo is the compact moulded wheeled case that can transport display items and graphics safely and then convert into a single counter or use two cases and an Ellipse shaped counter.

Code	Outer Dimensions	Internal Dimensions
CASE-LEO	H 95 x W 41 x D 35cm	H 93 x W 34 x D 27.5cm

PEGASUS CASE

The Pegasus is the premium moulded 'clam style' wheeled case that transports a wide range of our back wall displays and accessories into a large ergonomic graphic display counter. Includes folding table top and is available in black, white, silver or oak. Combine 2x Pegasus Cases for the ultimate portable display stand.

Code	Outer Dimensions	Internal Dimensions
CASE-PEGASUS	H 99 x W 64 x D 41 cm	H 95x W 58 x D 35cm

POLY CASES

Polypropylene fabricated cases are available with fast lead times from our standard range and custom sizes can be made on demand. They're the ideal, stronger alternative to cardboard boxes, and a more cost effective solution than our flight cases. Tough, durable and splash proof. They are constructed from HDPE, and can be custom made to fit your individual specifications. Poly Cases are constructed with a welded steel metal frame around the top to give it a more rigid structure, and a variety of handles, shoulder straps, lid retainers, foam linings, custom made foam inserts and wheels can be utilised – the options are endless

FLIGHT CASES

Flight cases are the finest way to transport your investments if budget allows, any quantity, any size and a choice of finishes and options, just ask. Our tough and rugged Flight Cases provide on the road protection for your valuable equipment. We offer both off the shelf and bespoke flight cases which can be designed and custom built to your exact specification.

Transport Bags

"The easy simple way to carry your valuable kit around"

Custom made padded bags, covers and soft cases are strong, durable and reliable while also being extremely lightweight and cost effective, making them an ideal alternative to flight and poly cases when a rigid solution is not required.

Padded bags and covers are the perfect solution for protecting all your individual display products.

Available from stock or made to order in our factory.

- Wide range of standard bags available in a choice of specification
- All smart black finish as standard
- Easiest and most cost effective way to transport your display
- Wheels and padding available as options

ABOUT TRIFIBRE

Established in 1981, Trifibre Ltd has developed and progressed into a highly respected, innovative casing solutions designer, manufacturer and supplier to many industry sectors.

We specialise in working with major blue chip organisations and individuals. Manufacturing flight cases that meet military specifications and certified cases, bespoke poly cases, complex bespoke metal containers, custom made wooden and plastic presentation cases, made to measure metal fabrications, wooden packing crates, exhibition stands and much more.

Trifibre can trace its routes back to the exhibition industry. From poly cases for graphics, to flight cases designed to move whole exhibition displays its experience in this industry is unrivalled.

Very Displays and Trifibre formed a life-long partnership early 2017 and look forward to working together across multiple display projects.

Lights

Illuminate your display with Halogen or LED lighting, floodlights and spotlights that brighten your message and that can turn normal into brilliant.

LIGHTING

"A very important part of any display!"

All types of lighting from flood to spot, illumination is important.

- Conventional Halogen floodlights 150w great output and value
- LED Floodlights 12w that give the same output as the 150w Halogen
- LED lights are approx. 6000 Kelvin giving a bright white output
- Lights can be used in Uk/Europe by simply changing a lead

ILLUMINATE YOUR DISPLAY
LED OR HALOGEN OPTIONS
CAN BE USED ON MOST PRODUCTS

WHY LED IS GOOD FOR OUR PLANET

- LED is a far more green way of lighting your display using as little as 10% of the energy used by traditional lighting
- LED are 12V so naturally safer and less to worry about within you display
- LED lights are more durable and less likely to break as no filaments
- LED lights last much longer in fact as much as 20,000 hours – a long time! nearly 2.5 years if left on every day for 24 hours

- LED lights run cool and do not get hot so are safer and will not burn or melt your display
- The LED sold here are around 6000k (Kelvin) which means colour temperature and that equates to a cold daylight effect to brighten your graphics
- Some of our LED is also available as RGB (red, green, blue) as a TV which means it can change its colour by a controller to give a dramatic display

Floodlight halogen 150W Black

LED Lights 12W Black

Name	Code	Weight
Floodlight halogen 150W Black	LIGHT-HAL150	1.25kg
LED Lights 12W Black	LIGHT-LED12	1.25kg

One Five Life!

All of the products on these pages are covered by a manufacturers guarantee against defect. Every product has an icon which advises you on the guarantee we provide from 1 year to 5 years to LIFE !

Constant improvement and continuous development are part of our DNA and we measure quality. This means we may have to adjust and change the specification at times to ensure constant improvement of the product in line with advancements in technology and materials, this may happen without prior notice.

All the dimensions stated are approximate on these pages and always show the height first followed by the width.

No responsibility is accepted for a variance exceptions and errors or omissions.

Designs

Our products are designed by our own designers and some are protected by regional patents and Chinese patents. Our own designs are registered design copyright and we keep them all for reference.

Our products are made consistently but as with anything there can be variance, we suggest you check at the time. Graphic materials also vary in thickness, consistency and subject to weather and temperature act differently. Check at the time for the suitability of the material and batch.

Manufacturing

The products in this catalogue are a mix of standard items stored for immediate despatch in our large warehouse and a manufacturing factory that can make custom products to your shape, size and colour in just a few days. See the photo's at the front of this catalogue which show some of our capability which are significant in a wide range of materials. We are very pleased not to be just a warehouse and take pride in what we can make for you.

Print & Finishing

Graphics are also produced from your artwork in just a few days, you just need to provide the artwork file to your supplier and choose the type of graphic you require.

Large format digital printing

Digital graphics have been around for around 15+ years but technology is changing every year and the quality and speed are improving exponentially.

The common types available are UV, Latex, Eco Solvent, Dye Sublimation and Aqueous, talk to your supplier about what they offer and what is best for you requirement.

What is important is the artwork and file you provide as we have to blow it up many times to make the large format digital print.

The resolution and file type are important and you should simply take a quick look at our guide at the back of this brochure which gives you the minimum requirements we will need to give you a fantastic image on your new display or replacement graphics for the display you bought previously.

If you have have any specific close colour matches you require, we will need CMYK/Pantone references to help us get as close as possible. We will then do a test print and get you to sign it off before main production. Finally, we will produce from your artwork, send to RIP and print and finish your order and ensure we have a graphic that is fit for purpose. Your part is taking care of the print you receive so that it gives you good service and value for money every time until you want to change your message.

The fantastic thing about display systems is that they are usually made for graphic images and therefore can be used over and over again which means they represent great value for money!
